RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, and 36-44, drawn to wireless distribution network, classified in class 455, subclass 3.01.
 - II. Claims 10-16, and 45-50, drawn to cellular of data transmission, classified in class 379, subclass 1.03.
 - III. Claims 17-35, and 51-69, drawn to mobile terminal receiver and transmitter, and Doppler shift frequency estimation, classified in class 342, subclass 357.05.
2. Inventions I, II, and III, are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I related to a wireless distribution network. The subcombination has separate utility such as: invention II related to cellular of data transmission; and invention III related to mobile terminal receiver and transmitter, and Doppler shift frequency estimation.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 571-272-6968. The examiner can normally be reached on M-F (7:30 AM-5:30 PM), off every other Friday.
